REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: In combination with all the limitations recited in the independent claim, all the prior arts do not show an optical fiber connector comprising a first elongated portion with a first conical head formed on a first distal end and a first through hole; a second elongated portion having a first distal end securely received in the first elongated portion, a second through hole, and a second conical head formed at a second distal end of the second elongated portion; and two retaining elements each having hollow to receive the first and second conical heads and having a tapered through hole to respectively correspond to the first and second conical heads so that after the first and second conical heads are respectively in a corresponding one of the two retaining elements, diameters of the first and second through holes are reduced so that an optical fiber placed in the first and second through holes is able to be securely retained inside the first and second through hole.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
